Invitations to Industry
Thursdays, 5:30-7:00PM
Hill Center Room 703, Busch Campus
Co-Sponsored by the Erdős Institute, RU Math Department
and the Center for Cognitive Science

Please join us for our *Invitations to Industry* Spring seminar series at Rutgers University. We invited PhDs who have transitioned into industry to tell you about their experiences. They will talk about their career path, the skills necessary to succeed in their role, and the types of problems that they work on. There will be ample time to network and ask questions and we hope that you take this opportunity to join us!

There will be pizza served at 5:30PM, followed by a presentation and discussion led by our industry guest. See below for our Spring 2019 speakers.

March 14th   **David Renardy**, PhD, Senior Research Scientist, Two Six Labs. David received his PhD in Mathematics from the University of Michigan, and now works for Two Six Labs where he works on projects involving vulnerability research, cryptography, and other issues in cyber security. *Host: Mathematics (RSVP - https://goo.gl/yoHRmE)*

March 28th   **Srinivas Bangalore**, PhD, Director of AI, and **Shehab Jalavand**, PhD, Senior Research Scientist, Interactions. Shehab and Srinivas combine cognitive science, linguistics, and natural language processing methods to problems related to human-AI communication. *Host: Cognitive Science (RSVP - https://goo.gl/e9qi5K)*

April 11th   **Vita Markman**, PhD, Staff Software Engineer, Linked In. Vita received her PhD from the Rutgers Linguistics Department, and now she works on natural language processing applications and performing sentiment analysis of customer feedback for Linked In. *Host: Cognitive Science (RSVP - https://goo.gl/uEiBYa)*

April 25th   **Yadin Rozov,** Managing Director, Moelis & Co. Yadin specializes in financial institution advisory and has 15 years of investment banking experience, including extensive fixed income trading, structuring, and risk management. *Host: Mathematics. (RSVP - https://goo.gl/E8Gjdo)*
